

Top Guns Teambuilding Competition Mission Briefing

Mission Overview:

You're all on the same team but it's time to experience what being on a Top Gun team is all about! Best to pay attention on your first sortie in the simulator with your teammates. You'll be doing some head-to-head air combat right off the bat and need to hone your skills quickly because the second time you're in the sim, you'll be fighting for your team and Top Gun glory! The competition is held ladder style and will have each team member do combat while supported by their team members with the goal of winning the competition together. Lots of fun, action and ground time to socialize between hops make this mission a success.

Execution Details:

- Initial welcome and event mission briefing and creation of flight teams.
- Each team will undergo their pilot training together including a Hornet skills development session on our PC simulators and a pre-mission briefing.
- Next its time for an initial familiarization flight in CF-18 simulator including head-to-head air combat action against your team mates to prepare you all for the competition.
- Once all pilots have completed their familiarization flight, the Top Gun Competition begins. Pilots are briefed on the competition and the initial pilot combat order is set. All pilots compete in the initial qualifying round. Each flight of the competition will have one person from each team engaged in live head-to-head air combat for 10 minutes. During battle, the pilots' teammates will act as wingmen helping to support their competitor. At the end of the first round of flights the pilot scores are calculated and each team will choose two pilots from their team who will advance to the next round. These pilots will compete in the semi-final round from which 1 member of each team will advance onto the final Top Gun round! Once the competition is over, it's time to issue awards for team and individual success and participation.

Top Guns Teambuilding Competition Mission Briefing
